DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Monday, 17 January 2022 at 01:01 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels are expected to be Low across the UK, with dispersion further aided by a breeze in northern areas.

Tomorrow: Mainly Low air pollution levels are expected, but perhaps locally Moderate in more built-up areas in southern UK given light winds and areas of fog here.

Outlook: An unsettled interlude midweek should mean generally Low air pollution levels. Settled conditions should return thereafter, with local Moderate air pollution again possible in southern Britain in light winds here.
